 - A. more complete sets to be included for tenant-communication
 - B. key features on a few changing slides for quick tips on busy lobbies
 - C. other

Introduction to Office Flow solution in your building

Simplicity of travel

TIPS FOR MAKING ELEVATOR CALLS

Destination panels

This building has a system where you choose the destination floor on elevator lobby. The system will then guide you to the optimal elevator.

Room for everybody

When every passenger makes their elevator call, the system is able to divide the rides in the best way and avoid overcrowded elevators.

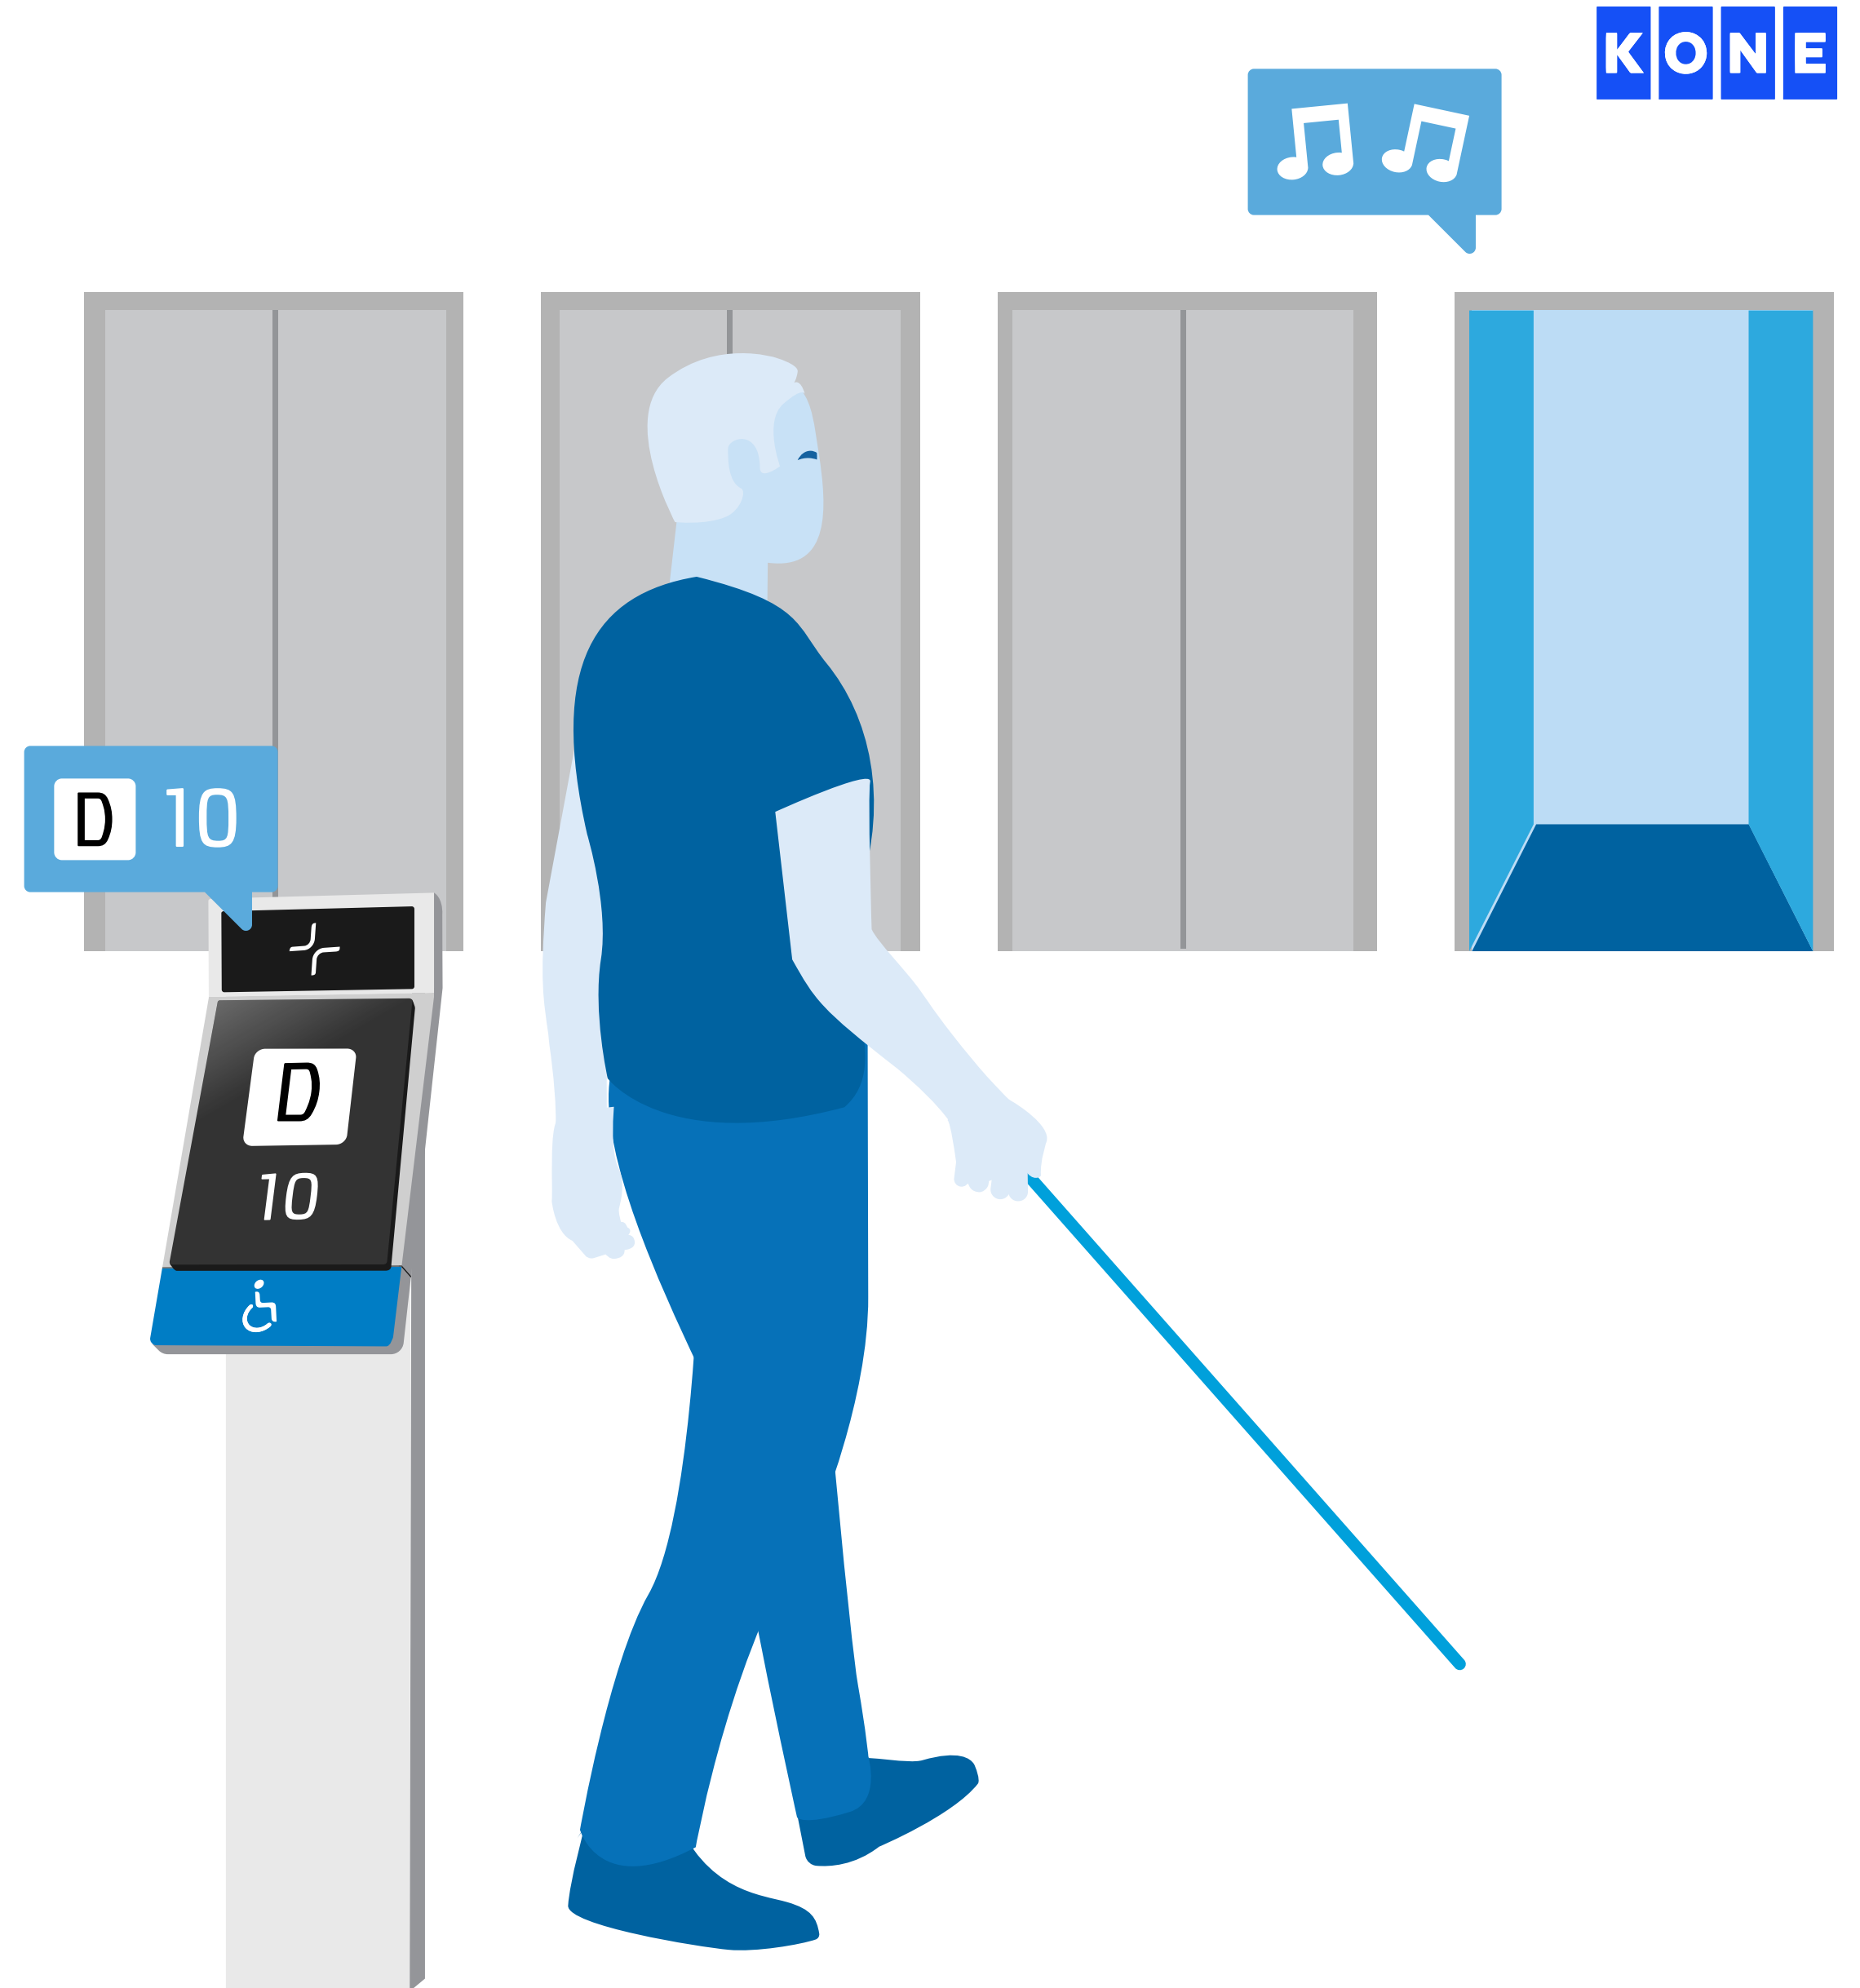

Destination displays

Once you have made an elevator call, you can use destination displays to double check the elevator which is serving your call.

Accessibility mode

Tap the accessibility call button for longer door opening time and voice guidance to find the right elevator.

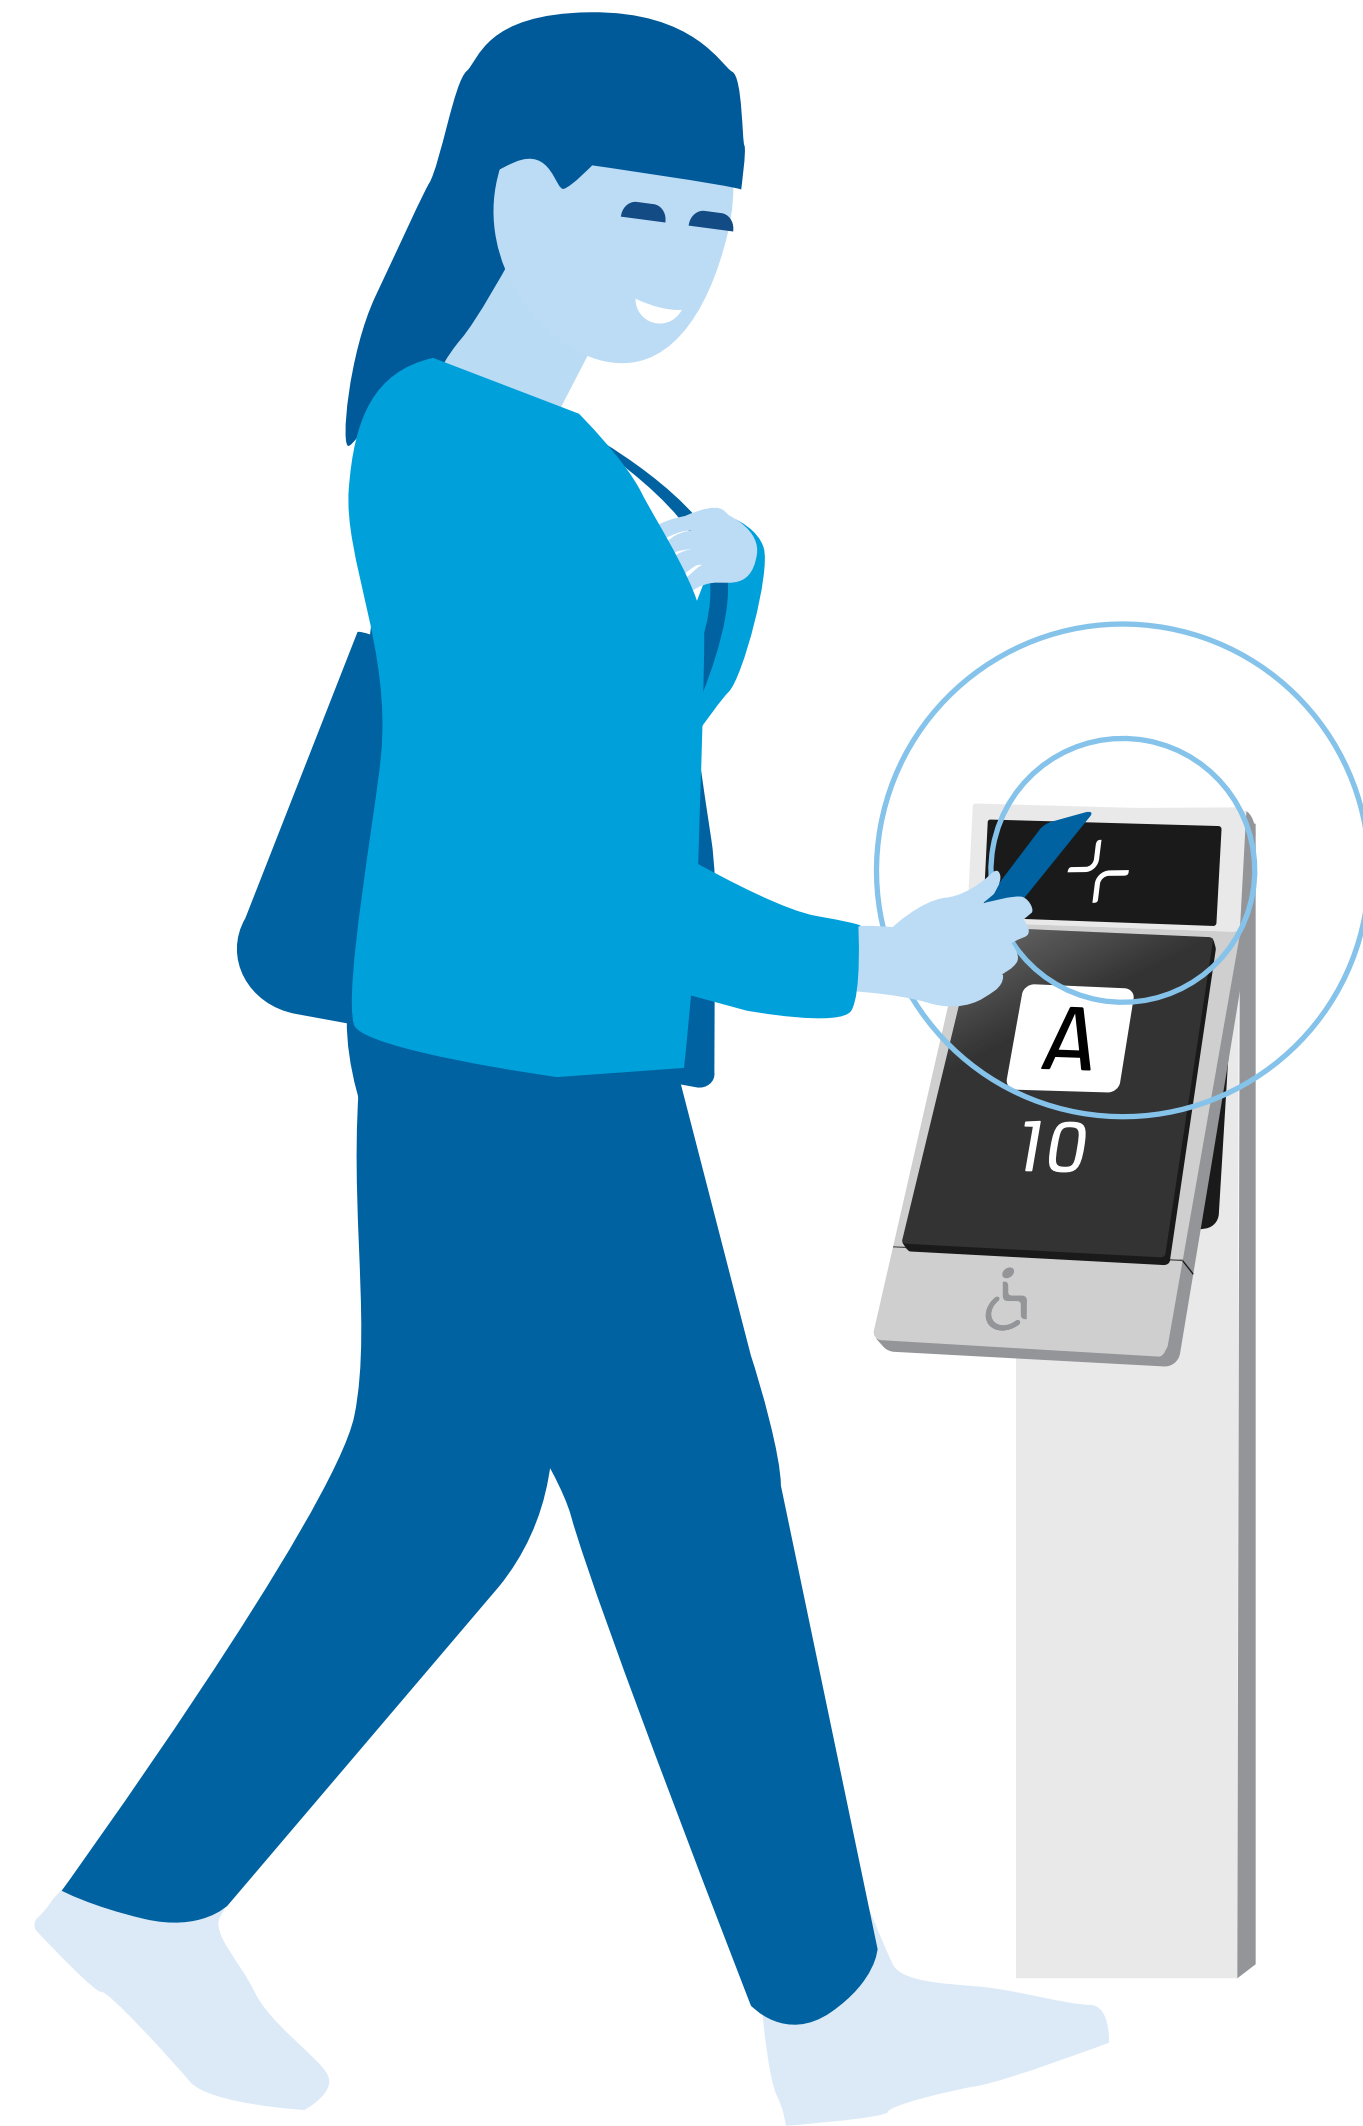

Personalized access

USING YOUR ACCESS CARD

Tap for instant call

Tap your key at the reader to get a call to your home floor effortlessly and quickly.

Access all your floors

Hold your key on reader until you see a list of all the floors you have access to.

Priority call

To ensure your call gets a higher priority and a dedicated elevator, select Priority call from personal menu.

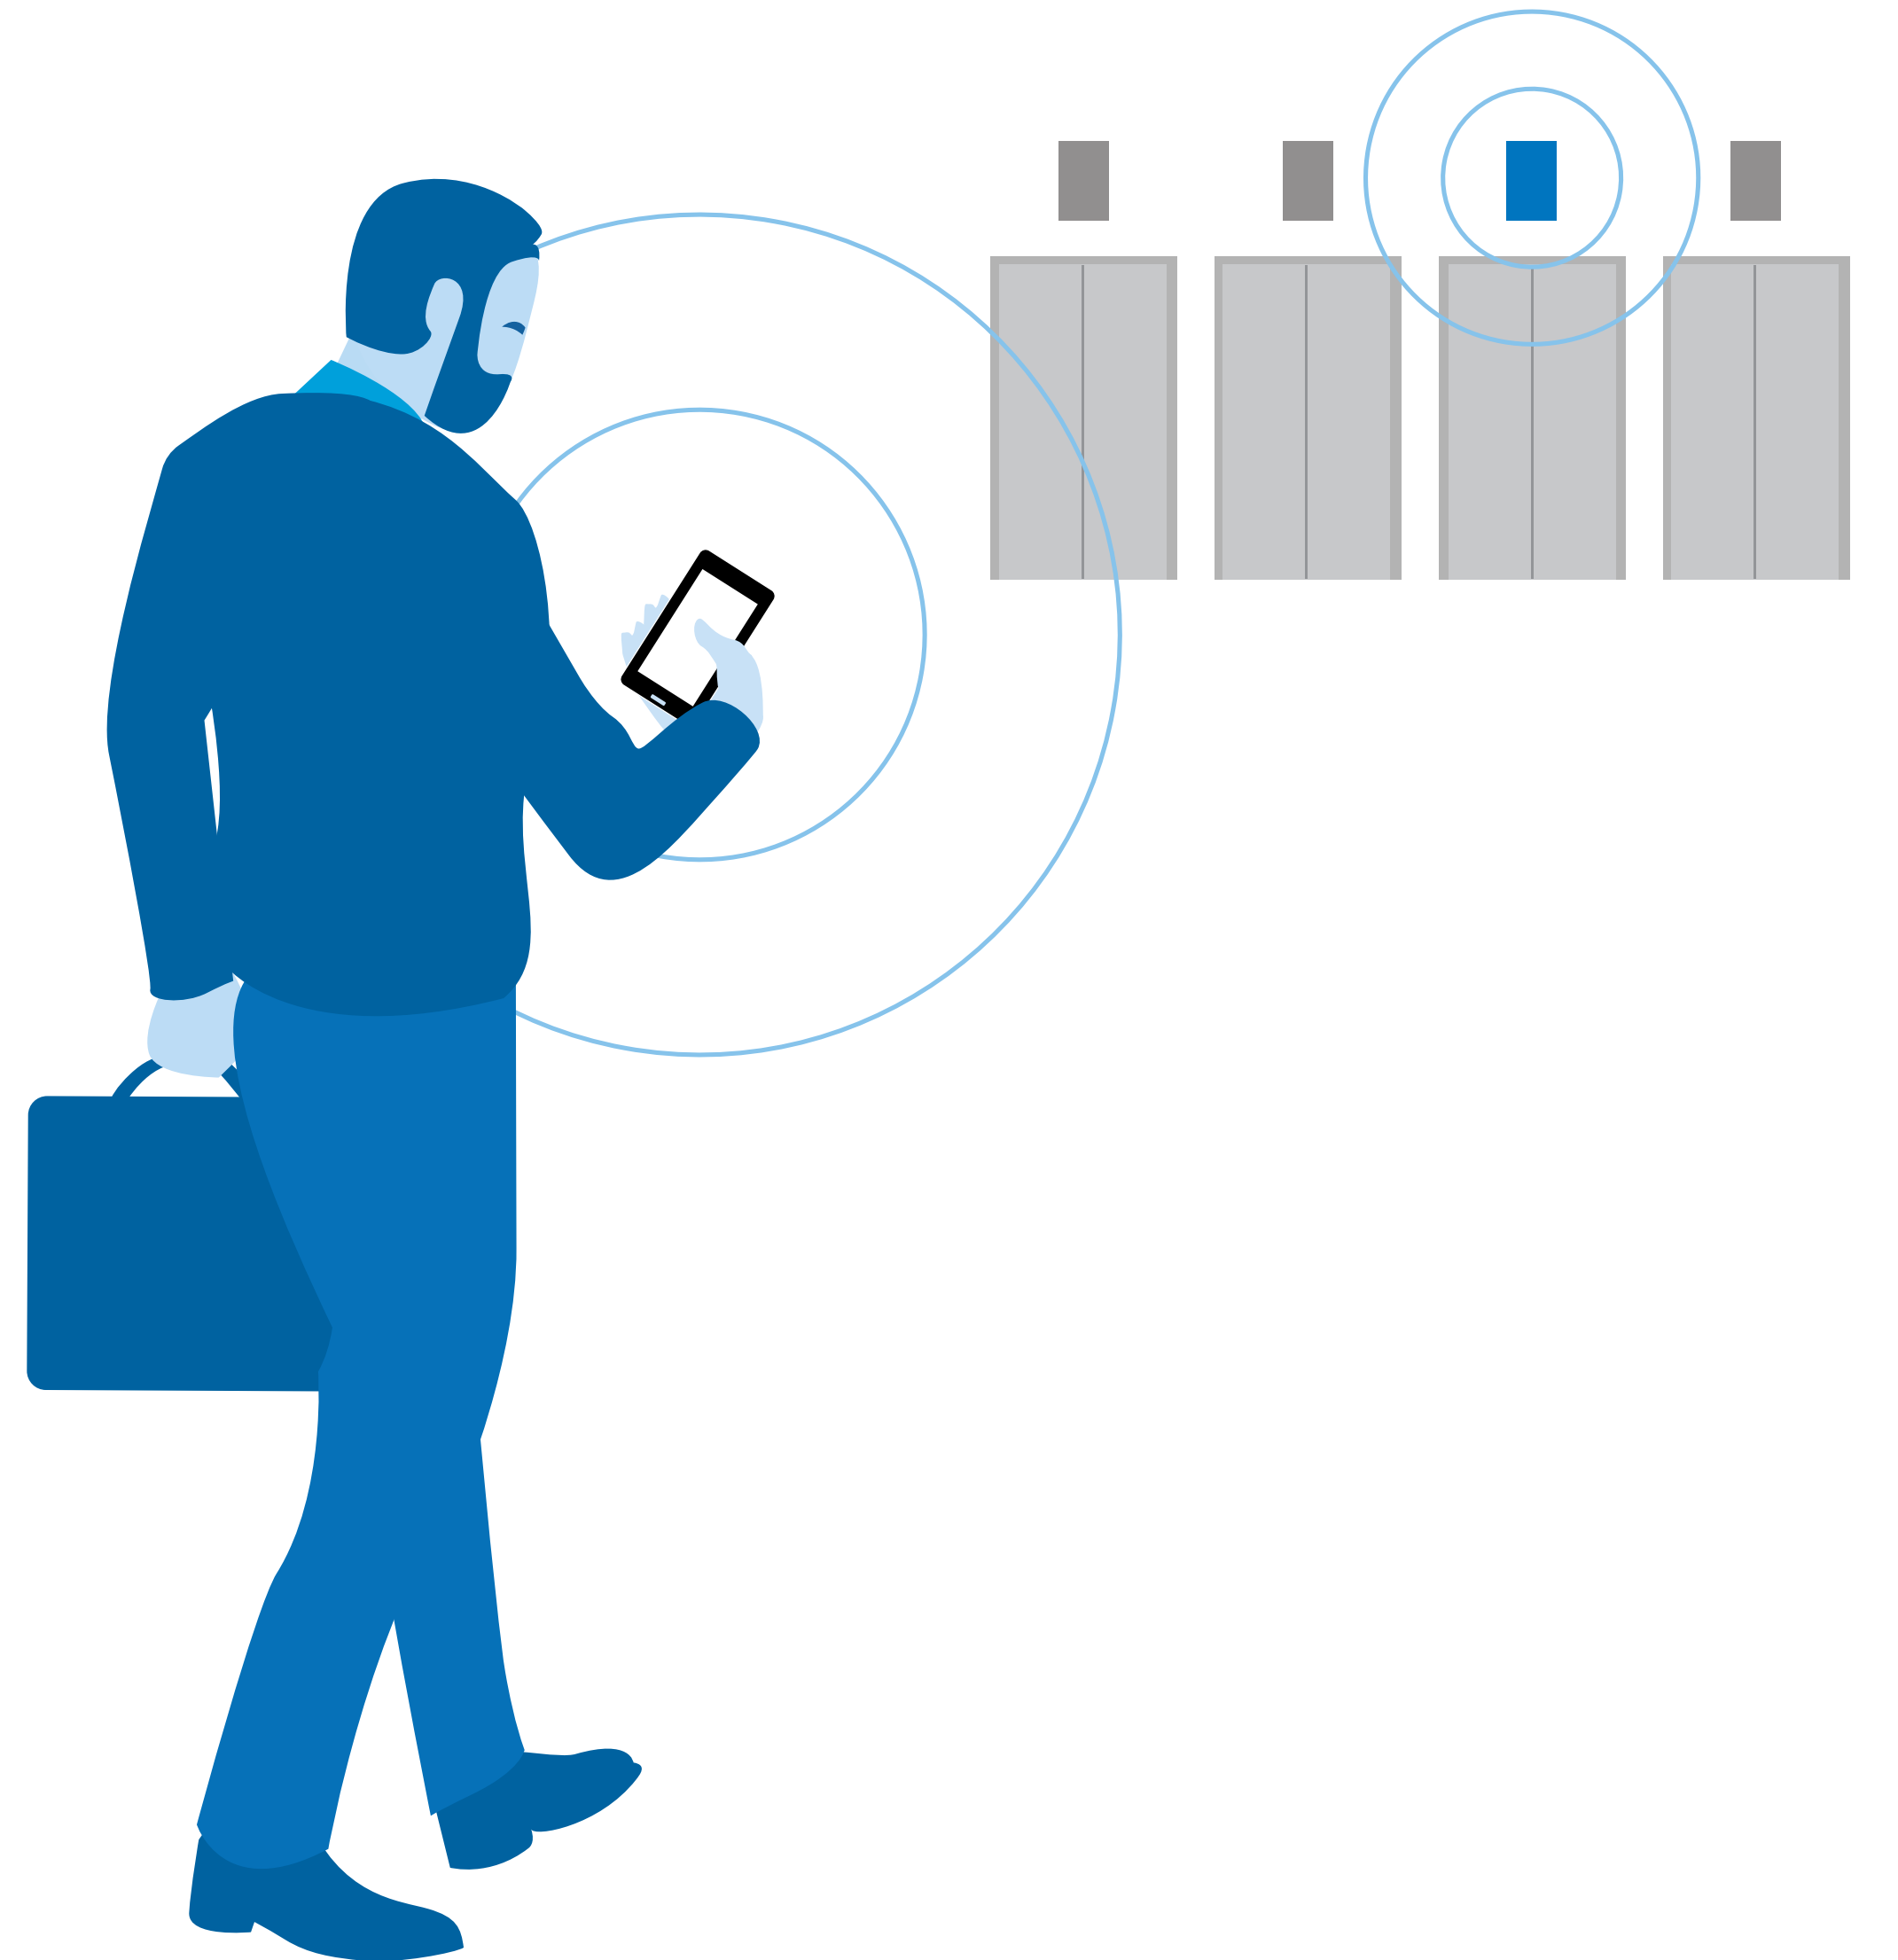

Elevator waiting for you

CALL ELEVATOR VIA MOBILE APP

Call elevator with an app!

This building has KONE Office Flow app for making elevator calls. Consult the front desk for more information.

One tap to favorite floor

Most of us use only a few floors on a daily basis at the office. Favorite floors on the app make calling an elevator easier than ever.
